

SOFTENING SYSTEM

PURPOSE: Removal of excessive minerals and Iron (Fe)(up to 10ppm Fe) in your water.

RESULT: Softer hair and skin; clothes last longer (less lint in the dryer) and extends the lifetime of your plumbing. Beverages, soaps, conditioners, cleaners all work as designed without having to coat over the harness and minerals.

VALVE WITH DIGITAL CONTROLS

Commonly known as a **Water Softener**, our commercial/residential hydro-matic line of systems provides the right system for the right application based on properly custom engineered systems. When it comes to water treatment, there are endless options. We custom build your system for you based on your exact needs and specifications. From commercial grade systems, to the newest residential water treatment technologies, we have what you need. Our state-of-the-art valve with digital controls (one example shown above) is the latest in water treatment technology. 25yr warranty on valve bodies and tanks, 5 years on electronics (due to the nature of electrical systems, we have been using these electronics for 20+ years with very little maintenance required.
