

## BIG BLUE SEDIMENT FILTER

**PURPOSE:** Removal of silt, sand or other sediment larger than 5 microns.

**RESULT:** Less sediment particles improving the flow and appearance of your water. Protects your investment in water treatments, greatly reducing wear on controls and lowers operation costs.

**MOUNTING BRACKET**

**HARDWARE AND WRENCH**

**REPLACEMENT FILTERS**

Big Blue® filter housings offer the versatility to meet all of your large capacity filtration needs, including high-flow and heavy-sediment applications. The extra-large housing allows for greater cartridge capacity, reducing the number of vessels required for high flow-rate applications. Sumps are constructed of durable reinforced polypropylene and are available in both 10" and 20" lengths. The high-flow polypropylene (HFPP) cap is available with 3/4", 1" or 1-1/2" NPT inlet and outlet ports. The 1-1/4" internal port allows a greater volume of liquid to pass through the HFPP cap more rapidly. Big Blue® housings are compatible with a broad range of chemicals and are available with or without an optional pressure relief button. They accept a wide variety of 4-1/2" diameter cartridges in either 10" or 20."
