

## CONSTANT PRESSURE SYSTEM

**PURPOSE:** Constant pressure of up to 100psi at 32gpm continuous flow.

**RESULT:** Run many appliances/showers at the same time. Be able to shower while doing laundry, flushing toilet, etc...(Note: This equipment only deals with pressure, you do need to have enough water!)

Utilizing the latest in pump and tank technology, LPSI provides the homeowner or business with a constant pressure of up to 100psi at 32gpm continuous flow from a 3-400 gallon storage tank. Never loose pressure again! We have installed homes with up to 1000 gallons of reserve water (most applications maintaining 60-70psi is recommended).
